

Leadership 12

Global Leadership

Miss Senathirajah

Scenario One

Your Objective

Create three plans of actions that work to resolve three levels of danger. You will work with your government to collaboratively find a solution to three levels of danger that aligns with your country's philosophies.

So there is another virus on the loose...

- Taylor Swift Land has reported a new virus on the loose called Tri-RedX. With a delayed response to the virus, it can be safely assumed that it will also infiltrate your country. This is your chance to create plans of actions to ensure the safety of your country and its citizens.
- This virus spreads via contact and through contact with respiratory droplets of infected people

Miss Senathirajah

What are your responsibilities?

01

Create a level 1 plan

03

Create a level 3 plan

02

Create a level 2 plan

04

Defend your position

Level 1

Preventative Measures

This plan will be for preventative measures, or protective measures. This plan will outline the steps your group will take, or strategies you will implement to ensure you protect your country from the potential exposure

How would you manage your country for preventative measures?

How will you manage your

- Imports and exports
- Education protocols
- Managing and protecting labourers
- How to support the economy in the case that the economy has to shut down
- What is your plan to re-allocate money in the case of an emergency?

Level 2

Prevention Fails

Your preventative measures have now failed. Either your country feels a few effects, or your country feels the brute force of the virus. What does your country do now?

How would you change your plan?

How will you manage your

- Imports and exports
- Education protocols
- Managing and protecting labourers
- How to support the economy in the case that the economy has to shut down
- Will you be continuing your plan to re-allocate money?

Level 3

Worst Case Scenario

This is your worst case scenario. Your preventative measures have failed, the virus has infiltrated your country, and now you must develop an emergency plan to protect your country and its people

What is your all out emergency plan?

How will you manage your

- Imports and exports
- Education protocols
- Managing and protecting labourers
- What is your emergency plan for the economy?
- Will you be continuing your plan to re-allocate money?
